Bob, I do not know if you are using Endnote for your report/appendix, but Barbara's comment reminds me to remind you that I had all of your references from your first draft were entered into the Bristol Bay Assessment group folder on Endnote Web.

Subject: Appendix Version of Mitigation Document

Hi Kate and Glenn,

I wasn't sure if you wanted the appendices by COB today also, but I have gotten it to where I'm okay with it, so it is attached. Kate, as discussed earlier, this no longer includes the things that are now included in other sections of the mining scenario - it is strictly the standard mitigation practices, and includes a brief section on the compensatory mitigation that Palmer expressed he wanted included (at the meeting in WA).

I had some issues with formatting of in-text citations, but think I've worked around it okay. Glenn - I owe you a huge thanks for entering in all of my prior references, as that saved me a ton of time doing it (I've never used Endnote until today to add a few more), so THANKS!!

I could not figure out how to get my references to sections of the CWA to be what I wanted in the text portion, so I don't have them in Endnote at all, or in my reference list. Instead, I use the full citation that I want in with the document text.

Cheers,
Barb
